  - Industrial flooring
- 3 CONSTRUCTION**
  - Engineering construction contracts
  - Construction management

# STRUCTURAL RETROFITTING & REHABILITATION

**Wisdom Techseal** has been a leader in the field of structural retrofitting and rehabilitation of old and heritage buildings since 1995.

Re-strengthening of an old structure such as a heritage building or bridge is not a simple task and needs to be dealt with special care to avoid accidents.

Over the last few years, the construction industry has seen an increased amount of accidents that could have been avoided by re-strengthening of the structure. Deformities in a structure is caused by following poor construction practices, increase in estimated load and design inadequacies. The following methods can be used to strengthen the structure providing the desired strength in confined spaces

1) Micro concrete with jacketing

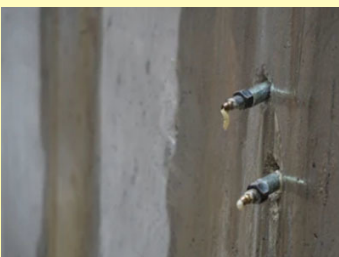

2) Fiber wrap system

3) Guniting/ shot creting

4) Injection grouting

5) Polymer modified mortar

## ENGINEERING SERVICES

A structure that is not at its structural capacity is dangerous for its stakeholders. No adequate system adopted for waterproofing can lead to heavy ingress of water creating health issues. Also, monetary loss caused by water coming in contact to personal belongings and electrical appliances is common.

Not only we are experts in providing waterproofing solutions, our engineering services range from all types of waterproofing, industrial flooring, and protective coating systems etc

Our stellar engineering services cover a wide spectrum of services that one might need during construction or after construction. We are more than capable of providing an aesthetic look to an existing structure while treating the deformity within the structure.

Following are many of the engineering services we offer:

### 1) Waterproofing

### 2) Industrial flooring

### 3) Protective coating

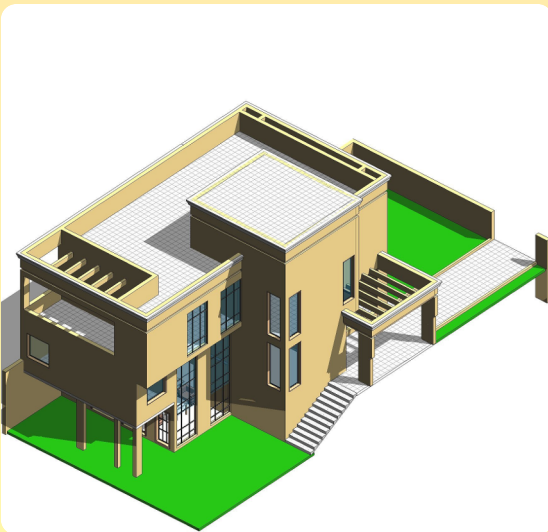

# ENGINEERING CONSTRUCTION CONTRACTS

For years, we have been a market leader in performing construction projects in the civil, commercial, and residential sector. We understand how crucial it is to perform a meticulous constructibility study before commencing the execution of a project.

Successful construction of a project requires a team of professionals possessing extensive knowledge of building materials, required equipment, and advanced technology to build a structure in accordance to the construction drawings and plan specifications. We, at Wisdom Techseal Pvt. Ltd., possess the adequate knowledge and experience to turn your dreams into a reality.

## 1) Construction Management
